

EXPERIENCE BEAUTIFUL HEALTH WITH SKINFIVE

The hand is a miniature of our body. Our hands restlessly work 24 hours a day. Look at your hands carefully now. The finger joints are deformed and thick with callus. The SkinFive rejuvenates your hands from the inside and the outside. The SkinFive emits far infrared rays that can reach 4cm below the skin treating arthritis and regenerating your skin cells. The heating function will increase blood flow and increase the number of blood cells. After five minutes, the dirt residing in the surface of your hand will naturally be removed with sweat leaving the skin clean and soft.

POSSIBLE BENEFITS

- Removes impurities
- Improves blood circulation
- Promotes collagen generation
- Recovers autonomic nerves
- Relieves arthritic joint and muscle pains

• Built-in Heating Function

• Emits Negative Ions

• Emits Far Infrared Rays

Infrared Photographs of Changing Body Temperature

Skinfive

Heat Therapy

The heating function of SkinFive will increase the flow of blood in the capillary vessels by a maximum of 10 times and increase the number of red and white blood cells in the peripheral blood of the body.

Therefore, it delivers the necessary nutrients needed for vital activities to every corner of the body and helps to eliminate waste, improving the overall metabolic system.

Far Infrared Rays

The far infrared ray is called "the ray of life" and it penetrates deep into our skin and revitalizes the skin cells. The SkinFive has built-in halogen lamps that produce far infrared rays that can reach 4cm below the skin expanding the capillary vessels and facilitating blood circulation. When the flow of blood increases, the muscles become more flexible, reducing pain and resulting in effective treatment for arthritis.

Negative Ions

When the Yellow Earth Plate is heated, it has a fomenting effect and helps to deliver the negative ions quicker. A prolonged exposure to the negative ions has several positive effects on the body. Studies show that negative ions can cleanse the blood, regenerate cells, purify the air, and control the autonomic nerves to balance the internal organ functions.

Recommended for:

- Hands with calluses from extreme use.
- People that are stressed from daily life.
- Hands that are numb and cold.
- People suffering from arthritis.
- Chapped hands in the winter.
- Rough and dry hands.
